Presenting RiskRecon, a platform to simplify compliance and enhance security amid stringent third-party management regulations.

Book here

In the current business landscape, there is a growing focus and responsibility to managing third-party supply chains and your chosen vendors. With the introduction of new and more strictly enforced rules and regulations, including Jersey's draft Cyber Security Laws and other UK and EU regulations; businesses are now required to take proactive measures and evidence the subsequent vetting to comply with rigorous standards for ethical, sustainable, and secure business operations.

Join Mastercard and Digital Jersey, as we showcase RiskRecon's automated risk assessment and management platform that will bolster your compliance and digital security responsibilities with

ease.

About RiskRecon:

RiskRecon, a Mastercard company, offers a leading cybersecurity assessment solution designed to help organisations manage third-party risk. By providing continuous monitoring and comprehensive evaluations, RiskRecon enables businesses to better understand and mitigate the cyber risks associated with their third-party vendors.

Key Features:

1. **Continuous Monitoring:** RiskRecon provides ongoing assessment of third-party cybersecurity practices, ensuring that organisations have up-to-date insights into the security posture of their vendors. This continuous monitoring allows for timely identification of potential risks and vulnerabilities.
2. **Comprehensive Evaluations:** The platform evaluates a broad range of security controls, covering areas such as network security, data protection, and operational resilience. This thorough assessment helps organisations gain a complete understanding of their third-party risk landscape.
3. **Customised Risk Ratings:** RiskRecon generates risk ratings tailored to the specific context and needs of each organisation. These ratings are based on objective data and provide actionable insights that help businesses prioritise their risk management efforts.
4. **Actionable Insights:** The platform delivers detailed reports and dashboards that highlight critical risk areas and suggest remediation steps. This enables organisations to take proactive measures to strengthen their cybersecurity defences.
5. **Scalability and Integration:** RiskRecon is designed to scale with an organisation's needs, accommodating a wide range of industries and sizes. Additionally, the platform integrates seamlessly with existing risk management and compliance frameworks, enhancing its utility and ease of use.

Benefits:

- **Enhanced Risk Management:** By providing detailed and continuous insights into third-party cybersecurity practices, RiskRecon helps organisations improve their overall risk management strategies.
- **Improved Vendor Relationships:** The platform facilitates better communication and collaboration with vendors regarding cybersecurity expectations and improvements.
- **Regulatory Compliance:** RiskRecon assists organisations in meeting various regulatory requirements related to third-party risk management, helping to ensure compliance and avoid potential penalties.

Use Cases:

- **Financial Services:** Banks and financial institutions use RiskRecon to monitor the cybersecurity posture of their partners and vendors, ensuring that sensitive financial data is protected.
- **Healthcare:** Healthcare organisations leverage RiskRecon to assess the security of third-party vendors handling patient data, thereby enhancing compliance with regulations such as HIPAA.
- **Retail:** Retailers utilise the platform to manage the cybersecurity risks associated with their supply chains, safeguarding customer information and transactional data.
